

Help for the intestine

AuxInt® Feed supplement for stabilization of intestinal flora¹

for dogs and cats

For the relief of acute intestinal absorption disorders during and after acute diarrhoea.

AuxInt Pet is used for pets (dogs, cats), especially puppies. Disturbances of the intestinal flora usually make themselves felt with unspecific diarrhoea. In young animals, this is often life-threatening!

AuxInt Pet

- calms the intestine
- promotes the regeneration of the intestinal flora
- supports after worming
- contains bioactive secondary plant substances such as tannins, bitter substances and flavonoids
- High-quality dietary fibre (β -glucan) from oats prolongs the retention time of the food pulp in the stomach.
- Beta-glucans have a generally calming and regulating effect on the digestive organs and optimise the bacterial intestinal flora.

Application:

- Puppies: mix 1 measuring spoon/day into the food.
- Bitches: 3 - 4 scoops/day, starting 2 to 3 days before the expected litter date.
- if your dog is not eating, you can administer AuxInt dissolved in warm water
- Recommended feeding duration: 1 - 2 weeks
- Offer drinking water for free disposal.
- If necessary, seek the advice of a veterinarian

Composition: β -glucan, sodium chloride, liquorice extract, ground caraway seed, ground fennel seed, ground galangal root, herbal mixture.

Ingredients *

Dry matter:	94,9%	Calcium:	0,26 %
Crude protein:	6,7 %	Phosphor	0,24 %
Crude fibre:	1,3 %	Natrium	3,14 %
Crude ash:	14,6%		
Crude fat:	5,5 %		

* Data in original substance

Manufacturer in according to VO (EG) 183/2005: RRNO-Research GmbH, Stadtoldendorf
Manufacturer-No. LAVES-131748

Note: AuxInt Pet is natural support for acute diarrhoea. It does not replace medication prescribed by a vet. If the diarrhoea lasts longer than three days or your pet demonstrates an impaired general condition (e.g. fever or listlessness), please consult a veterinarian!
